Teach Claude *new skills* in 2 minutes

The find-skills guide: search a whole library of free skills and add the right one.

What is a skill?

A skill is a small folder of instructions (a `SKILL.md` file, sometimes with examples) that Claude loads when it's useful. Add a skill and Claude follows that expert playbook: for reels, SEO, design, ads and more. **find-skills** (by Vercel) is the skill that finds other skills for you, from the public directory at **skills.sh**.

1 Install find-skills (Claude Code)

In your project folder, run:

```
$ npx skills add https://github.com/vercel-labs/skills --skill find-skills
```

Add `-g` at the end to install it for all your projects. Needs Node.js.

2 Ask Claude to find a skill

Just ask in plain words: *"Find a skill for Instagram reels"*. Claude runs a search like:

```
$ npx skills find instagram reels
```

and shows you options with the source and number of installs.

3 Check it, then install

- **Installs:** prefer 1,000+; be careful under 100.
- **Source:** official teams (e.g. `remotion-dev`, `anthropics`, `vercel-labs`) are safest.
- **Read the SKILL.md** before installing: skills run with your agent's permissions.

```
$ npx skills add <owner/repo@skill>
```

Using claude.ai instead of Claude Code?

- Download the skill folder as a `.zip` (it must contain `SKILL.md`).
- In Claude, open **Settings** → **Skills** and **upload** the zip, then switch it on.
- find-skills searches by running a command, so it works best in Claude Code, or in chats with code execution and internet access turned on.

Skills we actually use

Skill	From	What for
`remotion-best-practices`	remotion-dev	Making reels with code (transitions, captions, voice-over)
`social`	coreyhaines31/marketingskills	Hooks, captions, carousels, reel scripts
`find-skills`	vercel-labs/skills	Finding the next skill you need

Install counts change every day; check the latest on skills.sh before you install.

Try these searches

```
$ npx skills find social media content
$ npx skills find remotion video
$ npx skills find seo
```

Tip: keep your own "brand" skill too: your colours, tone of voice, prices and things you never say. Then every skill you add still sounds like your business. Comment **BRAND** on our reel for our free template.
